1. Orders

1.1 The order is understood to be accepted only by virtue of the seller's written confirmation. Up until that moment, offers and quotations formulated by the seller or by its agents, representatives or helpers are not binding for the seller.

1.2 Any general conditions of the buyer will not be applicable, partially or otherwise, if not expressly accepted in writing by the seller.

2. Prices and Payments

2.1 The price of the products is always understood including of packaging, but to be net of transport costs. If Insurance is requested, it would be charged separately.

2.2 The price of the products, and also any other amount due to the seller for any reason, is understood to be net at the domicile of the seller.

2.3 In the event of breach of the terms and conditions of payment, or financial difficulties of the buyer that have occurred after the signature of the contract, the seller is exonerated from any delivery obligation, even relating to products other than those to which said in observance refers. In such cases, the buyer forfeits the benefit of the term and consequently the seller has the faculty to demand immediate payment of the whole amount due, without prejudice to its right to withdraw from the contract, holding back the amounts paid by the buyer up to that point by way of partial advance settlement of the damages and with due reserve to additional damages.

2.4 The buyer may not enforce any non-fulfilments of the seller, nor enforce the guarantees indicated in Article 3 below, if it is not up-to-date with the payments; any non-fulfilments of the seller will not permit the buyer to suspend or delay payments.

2.5 Delays in payments with respect to the dates established will involve the automatic charging of interest, without the need for any request, at the official discount rate in force in the country of the seller, as well as the exclusion of the guarantee pursuant to Article 3 until settlement of the payments outstanding.

2.6 All banking charges except those of the Italian bank, must be on the buyer's account.

3. Commodity Inspection, Warranty

3.1 The seller is not responsible for the compliancy defects of the products and faults caused by the failure to observe the instructions anticipated in the instruction manual or in the technical data sheet (if available in our small box or into our official catalogue; otherwise it can be requested to our Technical Dept.). Neither will the seller be responsible for compliancy defects or faults which depend on erroneous use of the products by the buyer or if the latter has made changes or repairs without the prior written consent of the seller or, in any event, for those defects due to causes which arise after the transfer of the risk has taken place.

The buyer, on penalty of forfeiture, must report the compliancy defect or the fault of the products to the seller, specifying in detail and in writing their nature, within 8 days of receiving of goods.

3.2 The seller, after having ascertained the existence of the defect, must carry out the replacements with shipment.

3.3 Any compensation for any damages to the buyer may not, in any event, exceed the portion of value of the faulty part.

4. Delivery

4.1 The products shall be delivered Incoterms® 2010 – ExWorks Seller, according to the delivery schedule provided in the purchase orders.

4.2 The delivery terms are understood to be approximate in favour of the seller and in any event involving an adequate margin of tolerance.

4.3 In the event of split deliveries, in no event may the delay or failure to carry out one or more deliveries lead to the right of the buyer to terminate the contract in relation to the deliveries already made or future ones.

4.4 The delivery date will be extended for a period equal to that of the duration of the impediment, on occurrence of causes not dependent on the will of the seller and the buyer, such as strikes of any kind, fires, floods, power cuts, lack or scarcity of raw materials, malfunctions and accidents at the production plants of the seller, delays in granting authorizations of the authorities and other impediments independent from the will of the parties which temporarily render the delivery impossible or excessively onerous.

5. Transfer risks

5.1 Whatever the transport and return/shipment methods specified in the particular conditions of the contract are, the products travel at the risk of the buyer, even in the event of return carriage paid (CPT), or any other equivalent or similar clause, relevant for the sole purpose of disciplining the breakdown of the transport costs. The products are not insured by the seller unless written request is made by the buyer who, in that event, undertakes the related expense involved.

6. Ownership

6.1 Ownership of the products is transferred at the time of delivery to the buyer, if at that time the price has been paid in full.

6.2 In the event of sales paid by instalment, the buyer acquires ownership of the products delivered on payment of the last instalment of the price, but undertakes the risks from the time of delivery. In this case, the buyer remains the depositary of the products and the materials belonging to the seller until the moment the purchase price is paid in full.

7. Legal venue

7.1 The Local Court (Italy) in Naples, according to the Italian Law.
